Troubleshooting MLPA results

This article was retrieved from support.mlpa.com on Tuesday, 25th June 2019.

When your MLPA experiment did not work or did not give you the expected results, troubleshooting is sometimes necessary. To get started with this yourself, you can take a look at the following resources:

- The [MLPA quality control flowchart](#) contains a step-by-step overview of how to evaluate your data.
- The [MLPA troubleshooting wizard](#) offers an interactive approach to solve the issues that are most commonly encountered by our customers.
- The [knowledgebase](#) contains answers to several frequently asked questions.

If this does not answer your question or if you would like to get advice from MRC-Holland, you are of course also welcome to [contact us](#).
