Video: How does MLPA work?

This article was retrieved from support.mlpa.com on Tuesday, 16th July 2019.

MLPA[®] is the gold standard for DNA copy number quantification and is used to study both hereditary disorders and tumours. This animation explains how the MLPA technique works.

Please note that subtitles are available in several languages.

In case you're unable to view the video on YouTube you can also download it [here](#). Chinese customers can also access the video at [Youku](#).
